Top Korean Girl band BLACKPINK's ROSÉ has come up with her debut solo single, titled 'On The Ground'. The official music video premiered today on 12th March, at 2 p.m. KST. It is the title track of her first solo album, named "R". The music video is produced by Teddy, 24, and many other producers like Jon Bellion, Jorgen Odegard, ojivolta, etc. The music video features ROSÉ in various fashionable outfits and vibrant colors, starting with Black and Pink. Meanwhile, the fanatics are guessing whether it's a metaphorical link to her band, the pop track proceeds with a grunge-like ambiance with burning cars, falling chandeliers, fire, and flashes in an abandoned amusement park-like setting. The series of destruction is well balanced with creativity, aesthetic and soothing color palette. At the end of the video, The artist could be seen performing and levitating in a field full of white and pink flowers to the horizon.

Drake decided to not release his latest single, 'Splash Brothers' over Astroworld strategy

The recent Astroworld tragedy has shaken the entire music industry all over the world. Many artists have expressed their grief in different ways. Singer-songwriter Drake has decided to postpone the release of his upcoming single featuring French Montana to pay respect to the victims of Astroworld. Variety reports that the track, 'Splash Brothers' was supposed to be a part of Montana's fourth studio album, 'They Got Amnesia', which was to be released on November 19th. Now that the release of the track has been halted, it is more likely to appear on the deluxe version of the album. It has also been taken down from different streaming platforms like Spotify, Apple Music, and others. This is not the first time the two musicians have collaborated. They have teamed up quite a few times

before over the years. Some of their biggest hits are 'Stay Schemin', 'No shopping', 'Pop That', and 'No Stylist'. Drake was also part of Travis Scott's Astroworld set at the end as a special guest. He was also named in many lawsuits after the festival that caused the death of 10 people and injury to many. The lawsuit of \$750 million has been filed by the lawyers of 125 victims at Astroworld festival.

Drake expressed his grief on the tragedy on social media saying, 'I've spent the past few days trying to wrap my head around this devastating tragedy... My heart is broken for the families and friends of those who lost their lives and for anyone suffering.' Scott himself reacted immediately after the tragedy occurred saying that he was totally devastated by the event of the concert. He sent his prayers to the families of those who died and got injured during the Astroworld festival. He further said that he offers his full support to the Houston PD that has been investigating the tragic event. He has also committed himself to

working with the Houston community to support the affected families and help them heal. He thanked Houston PD, Fire Department, and NRG Park for their immediate response and help. He ended the post by saying, 'Love You All'.

Apart from Drake, French Montana's album, 'They Got Amnesia' includes songs featuring famous artists like Doja Cat, Kodak Black, Ty Dolla \$ign, Lil Durk, Pop Smoke, Rick Ross, Saweetie, John Legend, Fivio Foreign, Fabolous, Lil Tjay, Coi Leray, and many more.

Composer Brian Field produces political satire with 'Let's Build a Wall!'

With Broadway musical-theater stylings, Brian Field sends up political extremism on both sides of the spectrum with his latest work

Composer Brian Field has penned an American political satire with his recent work 'Let's Build a Wall!' for tenor and chamber ensemble, in a style that makes a nod to the tradition of musical theater.

The piece pokes fun at both sides of the political landscape in the United States. We hear on one hand, the extreme xenophobia and historical myopia on the right, and the over-the-top liberalism and lack of skepticism on the left. Field shifts back and forth between narrative viewpoints, always in a humorous vein. The vocals of tenor Zoli Mujahid, who was a Eurovision finalist, are delightful in this setting.

'Let's Build a Wall!' was recently awarded first place as well as the Audience Award from the Royal Sound Music competition, and a

Platinum Award from the LIT Talent Awards.

Compositionally, Field has been influenced by post-romanticism,

jazz and—clearly from this piece—the American musical theater tradition.

Field has received a host of awards previously, including the RMN Classical recording prize; the Benenti Foundation recording prize; the Alvarez Chamber Orchestra Mullord Award; First Prize, Briar Cliff

Choral Music Competition; and First Prize, Victor Herbert ASCAP Young Composers' Contest. Brian Field began his studies of piano at age eight, and began composing at age sixteen, eventually studying composition at Connecticut College, with advanced composition degrees at The Juilliard School and Columbia University.

Other recent compositions from Field are 'A Christmas Carol', 'Fire' and 'Tres Canciones De Amor' which can be found on the Spotify and Soundcloud platforms.

The American-based singer and songwriter Taylor Swift is an independent and versatile pop, country, alternative, rock, and folk singer. Hence, in her fourth musical album 'Red' she has composed some catchy and poignant music for the audiences. Furthermore, the lyrics of the songs in this album are very touchy and they can be hooked at the time of first listening. The instruments she is likely to use are guitar, banjo, piano, ukulele, and ecstatic vocal effects.

Some of her songs that I like to recommend you to listen to her songs 'State of Grace', 'Red', 'Treacherous' and 'I Knew You Were Trouble' from her album 'Red'. Each song of her is composed with a different beat pattern, musical progression, and vocal texture to provide different flavors to the listeners. Furthermore, the artist has explored country-pop during her second and the third album release. In these particular songs, she has used rock and roll flavor with a soulful touch. Thus, the singer always brings some exciting features and color in her every musical project. Some of her songs also obtain some electro-music effect for bringing dancing flavor into her songs. This album has 30 songs by this artist and some of them are featured with the other artists to make it ebullient for the listeners. The swift changes and the spontaneous flow of music from this artist lead me to listen to this

artist's song more and more. The storytelling nature of the songs in this album makes her songs stand out from the contemporary songs.

In 2018, she joined another recording studio Republic Records, and that produced controversy over the ownership of her masters. However, the music productions from this artist are always having narrative viewpoints among the songs.

I love her energetic vibe and the positive vibe introduction through her every song and that could change your mood towards a happy vibe. Moreover, the singer knows how to implement the instruments to make a maximum output for the listeners.

The title track of this album is a worthy one for the listeners of this artist as she has composed and written this song in an eclectic way. At the beginning of this song, she has used a ukulele piece and vocal with a piano background.

However, after a certain time, the singer catches an explosive tone with the grooves of the electric guitar and electrifying drum beats. Moreover, the lyrics of this song have a liberty vibe with breaking all of the mental and physical barriers. Thus, the heartfelt writing with an energetic vocal from this artist is just a bangin' feel to the listeners.

This particular song has been composed by her after it has witnessed and gone through by herself. Hence, this particular

song is about the people who sell themselves at any cost to get entry into the music industry. Hence, everyone will love you when you learn to love yourselves.

Regarding the music of 'Get On' it can be said that this song has a late-night vibe and the husky voice of the artist makes this song more intense. The usages of the instrumentals with the electro-effect and a particular beat keep going on throughout the music. Moreover, the vocal texture and the musical progression of this music complement the lyrics of this song. Thus, the listeners can easily catch the theme of the song and that is the main success of this artist. With the combination of melodic and simple rapping, the artist has shown her stronghold over the music. The sound of this music has become fierce and interesting with the jamming of two vocals at the same time with a different pitch. It would be nice to listen to further new songs from this highly creative and talented artist. masters by US executive Scooter Braun in 2019. The bitterness is still evident however, it could not stop the artist's indomitable spirit to create more tracks.

In April of this year, Taylor garnered a lot of attention with the release of 'Fearless (Taylor's Version)'. It is a rerecorded expanded version of the namesake track 'Fearless' which came out in 2008. It also featured Keith Urban and Maren Morris, taking things to the upper notch. Wawa Paswa's Latest EP 'BEST FRIEND' has Embellished the Hip-Hop Genre

One of the rising superstars of the Hip-Hop genre, Wawa Paswa is all set to rule the internet with his latest EP 'Best Friend'. The EP is beautifully plotted in a single video, which tells the whole subject matter of the song very vividly, and magnificently. His innate talent in composing music and understanding of lyricism are apparent in this EP. Well, we got the opportunity to interview this artist. So, let's check how it went on:

Q. Hey Wawa Paswa, Congratulations on your latest release 'BEST FRIEND'. Not so surprised that your latest EP video is being loved by thousands of audiences from all over the world, but there is something magical that your fans have found in your music; your voice. Tell us how you manage to sound so magical?

Ans. Thank you so much for the love and support. One of the things about this project that allowed me to sound so magical was just the ability to be in my element and do what I love the most such as vocal exercising, listening to the instrumental over and over while my team and I write the lyrics.

Q. The theme of the song is beyond any appreciation. Tell us what inspired you to come down to such a theme?

Ans. What inspired me to come up with the Best friend theme was "Dim pa la" meaning (Tell them I'm not here) which is the fourth track on the EP it was the first record I recorded on the EP and it was supposed to be a single. The vision my brother Geeda_G the director had for dim pa la video was 25 minutes long and that's when I decided to flip the project into an EP of four songs for the audience to have a better understanding of the story.

Q. How much important is your best friend in your life?

Ans. My best friend is one of the most important person to me because I care for her and she make me believe in myself, What I thought was trash she made me see it a differently. There were times I got frustrated doing the EP she would tell me to stop, walk it of, eat something and take a rest go stretch. She's very supportive, she supported me from the beginning of the project till now "Best friend"

Q. Did you ever imagine that your song will be loved by so many people? How are you feeling right now?

Ans. I am so grateful for the love and support I am receiving from all of my family, friends and fans. It's overwhelming in a great way. I imagined that I would get compliments for the songs, but the outpour of everyone's love and positive feedback is amazing. Right now I feel like I am on top of the world and the

best is yet to come. This is the reason I did what I do. To allow my sound of music to penetrate the souls of everyone who took the time to listen and embrace my creative side.

Q. What had driven you to choose your genre of music? And who are the artists you are inspired by?

Ans. What's driven me to choose my genre is comfort and sounds I truly admire. The artists who I am inspired by are Sweet Micky, Wyclef Jean, Jay Z, Beyoncé, Maroon 5, One Republic, Kai, Dr Dre the list goes on Akon, Dexta Daps.

Q. Lyrics or music which one is the most significant part of your EP?

Ans. The most significant part of my EP, I'd have to say is the lyrics. I believe so many people can relate to the story behind the music. It was truly my pleasure creating a sound that I knew would draw people in, but the lyrics in each song is what seals the deal. Everyone can relate to a time in their life where my lyrics were actually their reality.

Q. What do you think is a dilemma of an artist like you while composing a song?

Ans. One of the dilemmas I face as an artist and a composer is really finding what sound best suits me and what genre of music I should tackle first. I spend so much time constantly creating new music, new sounds, and they are all very unique sounds. So the dilemma I have is the urge to mesh different genres together. It's never been done before so I'm taking my time perfecting my craft.

Q. What are your views about today's hip hop industry and what according to you is it going on now?

Ans. My views about the hip hop industry now is that it's not the same as it was when I was growing up. Change is expected, so it's ok that part of the industry has evolved, but I want to bring back true 80s and 90s hip hop and modernize it.

Q. Your EP is an excellent blending of reggaeton and Hp-Hop. How likely is it that you do such mixing?

Ans. As I mentioned before, it's so tempting for me to

constantly mesh different genres of music together because I am able to create a sound that fits whatever genre. So it's very likely that I'll mix Reggaeton, Afro music, Zouk, Kompa and hip hop in my upcoming projects in the future

Q. After this EP, I believe, there are many budding hip-hop artists to have been inspired by you. What is your advice for them?

Ans. My advice to the upcoming artists that I've inspired, first off, let me say thank you for the support and the love. I am truly humbled to be a figure that people can look to for inspiration. My advice is to find that one thing that you love, no matter what it is, and believe in yourself enough to create it into reality. Nothing you dream of is impossible if you truly believe in yourself. You can do it and you will do it. So start now and get it done.

Q. What are your future plans with music and life? And where do you see yourself in the next few years in your musical career?

Ans. My future plans with music is to perform everywhere I can, touring, please my fans. And I'm looking forward to have my music on a movie soundtrack.

Q. Any message for your fans that you wish to deliver?

Ans. The message I wish to deliver to my fans is stay safe, safety's first and focus on your dreams don't give up, it's not easy but don't you ever give up ski's the limit.

KNOW EVERY NITTY-GRITTY ABOUT SHEHNAI AND ITS MUSICAL INFLUENCE

Originated from the Indian Subcontinent, Shehnai has been one of the most influential wind instruments in South Asia as well as other regions. It is a flute-like long wind instrument that is widely used in Indian Classical music as well as other contemporary and folk music. The deep sound and auspiciousness of the instrument have made it one of the holiest instruments for which it is being played in Indian ceremonies such as weddings, worshipping in temples, and even processions to celebrate. There is a myth that the sound of Shehnai can bring good fortune.

History

Some say it was invented at a similar time when the European oboe came into the market. However, it is also said that the instrument has evolved since the Persian Nay. There are some illustrations and representations of Nay found in the Egyptian Tomb which dates back to 3000 BC. In India, Shehnai is associated with the nine musical instruments played in the Royal Courts. Later, at the beginning of the 20th century, it gained recognition as a classical instrument.

Description

Shehnai (or Surnai) is a wooden wind instrument with a North Indian origin and it was also known as Oboe Hindu. But unlike the European oboe, Shehnai allows changing the intensity of the pitch by manipulating the wind pressure through the lip and the mouthpiece. Though the instrument has some similarities with

the South Indian Instrument nadaswaram, Shehnai is more popular in the nation as well as internationally. The tubular instrument has a conical shape which has a narrow end with a mouthpiece and the other side gradually broadens up to an opening. This aerophone is made of wood but the opening bell is a nickel-plated metal to offer a rich and dense tune. On the body of it, there are a total of nine to six holes to adjust pitch and scale. These finger holes are often closed and open by fingers while the player blows wind from the mouthpiece by firmly gripping the narrow end with lips. The double reed oboe has conical peak metal at the end known as Tudel which is inserted in the body to create a free flow of air with proper sealing. The set is inserted in the hood to create a sealed chamber of air while the player's mouth works as the constant supply of air as a part of the instrument. It can produce up to two octaves, one the A below middle C and the other one is up to above the treble clef (A3 to A5). The coups create a vibrating tune that doesn't require any exaggeration or pressurized blows.

Usually, Shehnais come with eight finger holes but it can be 6 to 9 holes depending on the requirements and style of the musicians. To adjust the sound and intonation, some of the Shehnai players prefer to close the other holes with beeswax that is not needed. The musicians are open to multiple interpretations and make changes to create new scales and musical notes.

The growth of Spotify: From the beginning to reaching billions in worth

Spotify is the leading digital music streaming platform today. Its current value is more than \$23 billion. Spotify is currently used by 61 countries in the world. It has a user base of 159 million with a collection of 35 million tracks. Founded in 2008, the Swedish company has grown tremendously over the years.

Let's find out how the company has become the biggest streaming platform in the world so quickly:

Spotify was founded by IT engineer Daniel Ek and entrepreneur Martin Lorentzon as a small start-up in Stockholm, Sweden. They were very much concerned with the never-ending piracy issue in the music industry at that time. So they developed the platform in 2006 that could be the answer to that problem.

The Spotify that we know today was launched 2 years later. Initially, the platform offered free music streaming services with advertisements. Their objective was to convert the free users to the £10 a month ad-free subscription.

Before the concept of streaming services came, most people used file-sharing sites like LimeWire, Napster, and The Pirate Bay to download music. These services have always been controversial as they discouraged users to buy music. The music industry experienced losses of millions of dollars each year as their sales dropped tremendously.

Daniel Ek said in 2010 that he realized people can never legislate away from piracy. He thought that the only way to remove the problem was to create an alternative service that was way better than piracy and profitable for the music industry at the same time.

He even had a hunch that his streaming service would flourish and be worth tens of millions in the future.

The competitions

The primary Apple Music stepped into the scene in 2015. It even made exquisite deals with the biggest artists like Taylor Swift, Drake, and Frank Ocean to stream their music first on the platform. And iTunes store had allowed the users to download an album or song by paying for that particular item.

Apple Music brought the concept of monthly subscriptions first. It offered unlimited access to the vast library of music to the users with their monthly subscription.

Soon SoundCloud also joined the bandwagon and introduced a new monthly subscription pack called SoundCloud Go in 2016 to counter Spotify. SoundCloud started as a platform for new and unsigned musicians to a paid music streaming platform. But the platform has only half of the top label music that is found on Spotify. Also the sound clarity and quality are way better on Spotify in comparison.

Controversies

Spotify has gained tremendous success in the music industry but had experienced its fair share of controversies over the years.

Most of the music on Spotify is either from major labels or independent artists. It pays the artists, songwriters, and record labels royalties for their streaming music.

Taylor Swift was one of the first musicians who spoke against Spotify in that matter to the public. She called out the platform on how much they pay the artists and called the entire platform an 'experiment'.

She said that she was not willing to contribute her entire life's work to an experiment. She claimed that she did not feel the musicians, writers, producers, and creators were compensated fairly for their music.

Spotify later said that they hoped Taylor Swift would change her mind and join them to establish a new music economy ideal for everyone.

Jay Z also said similar things about the platform and launched his own subscription-based music streaming service Tidal in 2016.

The Future

Spotify is bringing many changes to its services as time progresses. Like Apple Music, it is also more interested in putting live events. Spotify is set to face more competition in the future with Apple, Amazon, and Google developing their own streaming services. It is still the most popular streaming platform across the world.
